## SPORTS ACCIDENT COVERAGE

The sports accident insurance covers only registered members participating in a sanctioned event. This means members are covered at practice, as well as at tournaments, provided each practice has been properly sanctioned. Tournament sanctions are provided by the appropriate tournament director. Practice sessions can be sanctioned by simply completing the above request and mailing it to the Region Office, in advance of the requested date. **We realize, for the 2023 Season, some practices may be scheduled prior to the completion of the State High School season. But, in no case should a club member be forced to choose between participating in an event for their school, or one of your club events. If their school events are ongoing, then they should have priority. Club Directors must ensure that each participant has been properly registered through the on-line registration system, and all fees have been paid.** All scheduled sessions may be included on a single request.
